Paymark, BNZ, and Marketview expressly disclaim any liability to any person for anything done or omitted to be done by any such person in reliance on the contents of this report and any losses suffered by any person whether direct or indirect, including loss of profits.

DATA SOURCE

The data included in this report represents the total value of electronic card retail transactions. For a frame of reference, Statistics NZ report just under 70% of total retail is paid with an electronic card (ECT publication and Retail Trade Survey). The rest is comprised of cash, hire-purchase and any other less-frequent method of payment. The data (referred to as Hybrid Data on the graph below) combines our two primary data sets in order to capture the complete quantity of retail spending.

The first of these is the Bank of New Zealand cardholder base. This set is based on the eftpos, debit and credit card transactions made by BNZ cardholders. BNZ has around a 20% share of the cards market, so on average BNZ Marketview accounts for one in five retail transactions. (As at July 1 2015, there were over 650,000 active BNZ cardholders).

The second is the Paymark merchant database. New Zealand has two eftpos networks. The largest of these is run by Paymark, a joint venture owned by ASB, BNZ, (formerly) the National Bank and Westpac. Approximately 75% of New Zealand retailers use the Paymark network. This data set provides a complete view of all eftpos, debit and credit card transactions made at merchants on the Paymark network, both from New Zealanders and international visitors. (As at July 1 2015, there were over 40,000 active merchants on the Paymark network).

For retailers which are not on Paymark network, there is no transactional data available from on the Paymark database. To fill this data gap we weight the BNZ cardholder spending at non-Paymark merchants. The weightings would be based on BNZ's share of the Paymark transactions. The underlying assumption would be that the BNZ cardholders would make up a similar share of spending at Paymark and non-Paymark merchants. The graph below illustrates how our Hybrid Data is used to account for spend at non-Paymark retailers (BNZ proportions will differ from graph).

RETAIL OVERVIEW

FOR PERIOD ENDING JANUARY 2020 QUARTER

QUARTERLY ACTIVITY

Changes over same time last year

CARDHOLDER ORIGIN

	CARDHOLDER CONTRIBUTION	VALUE SPENT IN YOUR REGION	CHANGE (VS. SAME QUARTER LAST YEAR)
LOCALS	 73.0%	\$280.35 mn	 3.9%
